

SUPER STOMPER

RIG WALKING FOOT

OVERVIEW

Entro King-Pin walkers are currently in use in drilling rigs throughout the world. The Super Stomper is the next evolution of the design. The Super Stomper allows multiple jack cylinders to operate over a single large walking foot which allows the rig to operate at much lower ground bearing pressures than competing designs. The Super Stomper allows the rig to operate over soft ground while still allowing the rig to move in ANY DIRECTION.

- Utilizes Entro's proven King-Pin walking system
- Full length walking foot
- Move in ANY direction, as well as spin in place
- Uses standard proven mechanical components

TECHNICAL SPECIFICATIONS

CAPACITY	NO LIMIT
CYCLE TIME	60 Seconds
DISTANCE PER STEP	24" up to 48" Travel
JACKS	15" Lift
WALKING FEET (SIZE)	Any Length
ROLLERS	400MT Capacity (Custom Hilman)
STEERING	Manual (Standard) / Electronic Power Steering (Optional)
RIG CONNECTION	Pony-Sub
HYDRAULICS	Compatible with Rig HPU / Dedicated HPU Optional
